LA PSICOCINESI (META) DIGITALE

(Roberto Provana)

Premesse

Il termine Metadigitale si riferisce all'utilizzo delle tecnologie digitali nel campo delle ricerche EVANLAB - 1 settembre 2014

ACADEMIC QUALIFICATIONS

July 1964: Graduated from secondary school at the “Liceo Classico Ludovico Ariosto” in Reggio Emilia.

July 1971: Graduated from University of Bologna with equivalent of Bachelor of Engineering and Doctorate in Electronic Engineering (highest obtainable academic qualification in Italy until 1980).

November 1971: Passed the professional practice examination and admitted into the Engineering profession.

PROFESSIONAL EXPERIENCE

1971 - 1972: Taught Physics at the IPSIA (Istituto Professionale per l'Industria e l'Artigianato) in Reggio Emilia.

1972 - 2000: Lecturer in General Electronics at the Istituto Tecnico Industriale Statale (ITIS) “A. Meucci” in Florence, teaching fourth and fifth year students taking the Industrial Electronics course.

1978 -1986: Designed small and medium professional telescopes. (CERES srl – Empoli, Florence)

1992 - 2012

Worked as an independent consultant to industry, specializing in Linear and Sensory Electronics and Industrial Automation (SED srl – Certaldo, Florence; DAINESE srl – Buonconvento, Siena).

2001 – 2006: Collaborated with the Faculty of Engineering at the University of Florence in the.

European VISICON projects (a system in distribution for the computerized quality control of clinched boards), as well as in OPTAMS (OPTimised All Monitor System), the online optimizer and resource manager for manufacturing industries.

OTHER EXPERIENCE

Frontier science and the paranormal have been a part of his life since early childhood, when first

introduced to them by a paternal uncle. These subjects began as hobbies, but with time became more important until reaching prominence later in life, during which time he acquired a

level of knowledge and expertise in both hypnosis techniques and “frontier phenomena”. He went on to reveal a scientific explanation for so-called ORBs which appear in photographs, and provided a physiological reason for the ability to see the human aura with the naked eye. In the meantime he began designing and building equipment which would render the abovementioned phenomena technically accessible – turning the “paranormal” into “normal”.

Almost thirty years ago, with the intention of using hypnosis purely as a tool for research rather than for therapy, he gradually began conducting his first regressions into past lives. With the aid of hypnosis he then began to explore “Psychic Archaeology”, and in 2012 began a rewarding collaboration with the University of Padova’s Department of General Psychology – and in

particular with Professor Tressoldi – while simultaneously conducting studies of the Out of Body Experience, using an hypnotic technique he pioneered, which allows a two-way conversation with the person undergoing the OBE.

At present, he is the President of EVANLAB onlus and member of University of Padova’s SCIENCE OF CONSCIOUSNESS RESEARCH GROUP.

PARE GRANT 2015

2015 Parapsychological Association Research Endowment (PARE) Awardees Announced This year’s PARE funds will support teams who are investigating hypnosis-induced out-of-body experiences

The grants competition for the 2015 Parapsychological Association Research Endowment (PARE) has come to a close, and two grant proposals have been awarded. The Parapsychological

Association (PA) will be providing funds to support an investigation into out-of-body experiences (OBEs).

Luciano Pederzoli, M.Eng. (EvanLab) will direct proposed research into out-of-body experiences (OBEs) induced by hypnosis in a controlled environment at EvanLab in Florence, Italy. He will explore whether OBEs induced by hypnotic induction may closely resemble spontaneous occurrences of OBEs.
